💼 PROJECT EXPERIENCE

1. Pharma 360 (Online Medicine Order website)

Developed a full-featured online medicine ordering web application using the Bitnami WAPP Stack (Windows, Apache, MySQL, PHP). Designed and implemented user authentication, medicine catalog browsing, shopping cart functionality, and order processing. Built a secure and scalable backend with PHP and structured database interactions using MySQL. Integrated an admin panel for real-time inventory, user, and order management

2. e-Food

I have created an online food ordering web application using PHP, MySQL, and XAMPP. Designed and implemented features like user registration, login, menu browsing, order placement, and admin management for menus and orders. Used PHP for server-side scripting and SQL for efficient data handling and storage. Built a responsive and user-friendly interface using HTML, CSS, and JavaScript. Deployed and tested the project locally using the XAMPP environment.

📜 CERTIFICATIONS

- IIT Bombay – PHP & MySQL Training
- IIT Bombay – Java Training

🗣 LANGUAGES

- English (Fluent) | Marathi (Native) | Hindi (Fluent)
